

Program and Project Management

We manage the complexities of large-scale programs and free clients to run their business. Our seasoned program and project managers (many of whom are PMP-certified) oversee and execute programs using a myriad of project management methodologies (Waterfall, Agile, Six Sigma, Scrum, Hybrid, etc.) to drive results.

APPROACH

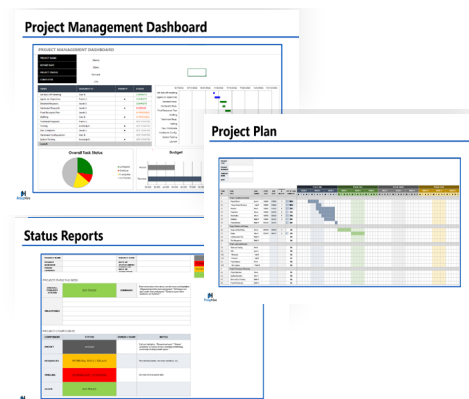

OUTCOMES

-  Responsibility matrix
-  Improved speed to market
-  Improved communication models
-  Clearly defined requirements
-  Alignment with stakeholders
-  Improved project productivity

DELIVERABLES

-  Project management strategy
-  RAID Logs with actionable steps
-  Budgeting strategy
-  Project Plan with timelines
-  Customized tracking metrics
-  Cutover Plan
-  Project Management Dashboard with an executive-level view of the project timeline
-  Status Reports to accurately identify risks and mitigation strategies
-  A designed Project Plan to meet the needs of individual projects

KEY CONSIDERATIONS

- » Business case and budget assessment
- » Stakeholder identification and alignment
- » Requirements analysis and scope definition
- » Communication planning with program reporting cadence
